

Table of Contents

CONSTRUCTION AND ARCHITECTURE

<i>I. A. Terekhov</i> Engineering method for determining the safe operation period of reinforced concrete structures	5
<i>A. V. Makarov, D. V. Ivasik, A. A. Vasilchenko</i> Waterproofing of concrete bridges is an important factor in their durability	12
<i>K. O. Chichirov, V. A. Garkina, T. Yu. Mamelina</i> Assessment of the technical condition of ventilation systems in shopping centers based on the forecasting method	20
<i>R. I. Shayakhmedov, Yu. I. Ubogovich, V. F. Protopopov</i> The use blast furnace pyrolysis process for processing household and industrial waste.....	26
<i>A. A. Provotorov, Ye. V. Tararushkin</i> Fiber-reinforced lightweight foamed composite based on phosphogypsum.....	33
<i>A. A. Provotorov, Ye. V. Tararushkin</i> Time-dependent strength development of phosphogypsum.....	37
<i>Yu. I. Tilinin</i> Technological foundations of the concept of forming a construction complex in a liberated city with the participation of enterprises from other regions	43
<i>I. N. Garkin, A. O. Popov, O. L. Viktorova</i> Optimizing work organization at cultural heritage sites: an entropy approach.....	50
<i>M. A. Amelina, Ye. A. Gromova</i> Crack resistance of reinforced concrete elements made of high-strength concrete: a comparative analysis of calculation methods according to the standards of the Russian Federation, the USA, and the Republic of Belarus	55
<i>S. D. Shmakov</i> Research of methods for calculating the ultimate value of the bearing capacity of a flexural reinforced concrete element	60
<i>S. R. Melikestyan, P. A. Kaydas</i> Redistribution of forces and crack formation in reinforced concrete frames under accidental impacts.....	69
<i>P. G. Maslov, M. V. Shavykina</i> Calculating the main parameters of friction resistance using the example of a two-console centrally loaded element.....	76
<i>Yu. V. Lazutkin, N. V. Kupchikova, A. A. Yeremeyev</i> Integrated engineering solutions for the reconstruction of the P. L. Apakov tram depot: from power supply system to protection against transport vibration	80

<i>N. V. Kupchikova, I. A. Demkina, Ye. O. Shkrudnev</i> Development of a software module with a web interface for tim model checking of buildings and structures during state expert review.....	86
---	----

<i>Yu. V. Lazutkin</i> Analytical calculation of vibration accelerations during the movement of subways, trams, and vehicles near buildings and structures.....	94
---	----

COMPUTER SCIENCE, COMPUTER ENGINEERING AND MANAGEMENT

<i>K. D. Yaksubayev, I. V. Aksyutina</i> The Cardano – Tartaglia equation and circulant matrices	100
--	-----

<i>O. V. Kudryavtseva, Ye. M. Byaletskaya, M. A. Kudryavtseva</i> An intelligent decision support system for managing machine-based information carriers based on human-machine collective intelligence.....	104
--	-----

<i>K. A. Proshunina, T. V. Khomenko</i> A model of information interaction between participants in the system of organizing landscaping.....	112
---	-----

<i>L. R. Teneshev, N. S. Maltseva</i> Development of algorithms for automatic resource allocation in communication networks based on traffic analysis and service priorities.....	119
--	-----

<i>I. A. Solovyeva, I. B. Muravyev, D. S. Solovyev</i> Mathematical model and software complex for a synthetic face image detection system in messenger environments based on efficientnetb3 convolutional neural network	126
--	-----

<i>A. V. Sinelshchikov, Ye. V. Ponomareva, Ye. D. Ponomareva</i> Development of a computational modeling methodology for analyzing vehicle velocity parameters based on the free-flight distance of an anthropometric object.....	134
---	-----

<i>Ye. I. Krupnov, I. A. Zaytseva, S. A. Loginova</i> Implementation of BIM technologies in the reconstruction and operation of utility lines of heating systems	142
---	-----

INFORMATION FOR AUTHORS.....	147
