

Table of Contents

CONSTRUCTION AND ARCHITECTURE

I. A. Terekhov
A model for reducing load-bearing capacity within the framework of the methodology for assessing the structural safety of reinforced concrete elements and buildings5

A. V. Golikov, A. V. Tanasoglo
Stress-strain state of solid cross-section dual-purpose supports taking into account the specifics of equipment placement 12

M. A. Amelina, M. N. Kuznetsov
Analysis of deformation of reinforced concrete columns under combined action of eccentric compression and torsion: review of theoretical and experimental studies 21

O. A. Vetrova, A. V. Peksheyeva
Improving the energy efficiency and comfort of a kindergarten building in accordance with the criteria of sustainable development..... 27

S. V. Okladnikova, G. B. Abuova
Intelligent decision support system for the design of ring water supply networks..... 32

S. A. Loginova, Ye. A. Korsakova, A. D. Nerubenko
The effect of frost destruction and natural moisture on concrete carbonation 38

O. V. Dushko, M. I. Bochkov, Ye. A. Maksyutova
Modifications of the compensating load method for structurally nonlinear problems of structural mechanics..... 43

A. V. Ignatyev, N. A. Kaplunov, M. A. Kulikov
GIS-based model for ecological landscaping of urban territories..... 50

I. Ye. Klyueva, E. Ye. Semenova
Influence of heat-conducting inclusions on thermal protective properties of enclosing structures of medical institutions 55

I. M. Rozhkov
A method for assessing the content of sbs polymers in binders 61

A. V. Sorokina, O. V. Ladygina, A. A. Fateeva (Ladygina)
An environmentally friendly model of a transport and transfer hub in a small city (using the example of Uglich, Yaroslavl Region) 69

N. P. Umnyakova, N. V. Kupchikova, K. V. Lyubavina
Development and verification of an actively adjustable facade system for a sports and recreation complex with a domed translucent coating..... 75

V. S. Fedorov, D. R. Asmalovskiy, V. Ye. Levitskiy
Experimental evaluation of thermal conductivity of lightweight high-strength concrete 81

A. V. Makarov, D. V. Ivasik, A. A. Vasilchenko
Economical bridge span structure with efficient spans 86

P. A. Korenkov, V. V. German
Identifying the nature of deformation of lintel beams with permanent aerated concrete formwork 93

COMPUTER SCIENCE, COMPUTER ENGINEERING AND MANAGEMENT

S. G. Gorst, K. A. Proshunina
A model for assessing the development of students' competencies based on learning activity data..... 102

A. A. Logashina, L. A. Pleshakova, V. V. Soboleva
The system of computer modeling of technical seo audit for improvement of business strategy of the enterprise 110

T. M. Lifanova, M. E. Gromovoy, S. V. Petrenko
Application of Thomas Saaty's analytic hierarchy process for a comparative system analysis of an aircraft and a helicopter as mobile platforms for an radar 118

N. V. Kupchikova, A. I. Sukhorukova, T. V. Zolina
Automated compliance checking of high-rise building design using bim and rag llm integration 125

V. V. Terekhov
Calculation of the verification of the functioning of the liquid purification device and selection of the optimal size of the outlet and slot channels according to the criterion area and volume of pollution particles..... 131

INFORMATION FOR AUTHORS..... 139
